A better way to grow

Seed to Sale Software Saving You Time and Money

While the marijuana industry is constantly in flux as it continues to makes strides towards legality across the United States, one challenge is an ever present constant – staying compliant with regulations. Complicating the matter is the fact that each state has its own policies and rules. Marijuana cultivators and dispensaries need technology to streamline the time consuming tasks of staying compliant, plant and package management, and sales tracking.

GreenLyfe360: Compliance & More Made Easy

GreenLyfe360 is a SaaS solution for the cannabis industry focusing on seed to sale software. Fully integrated and certified with Metrc (Marijuana Enforcement Tracking Reporting Compliance), our software helps marijuana cultivators manage plants, harvests, packages and transfers together in one comprehensive system built to keep you in compliance with your state.

Interoperability and Speed

Available on all major mobile platforms and desktop browsers, GreenLyfe360 integrates with some the industry's most trusted hardware to help you move faster and lower your operational costs.

- enter your data once and submit to Metrc in real-time
- connect to RFID readers and scan labels to initiate bulk actions
- group your plant labels and perform actions at any time
- record plant and package weights with Bluetooth scales
- audit your active inventory by location with a click of a button
- create customers and allow them to enter preorders

Alerts and Tracking

Get real-time alerts that notify the right people in your facility for operational and environmental events that need attention.

Point of Sale

Connect to barcode readers and submit receipts directly to Metrc. Add customers from our CRM database and link items, customers, and invoices to QuickBooks.

Holistic View of Data

With all your data in one place, you have the power to look at your process in any way you choose, helping you make key decisions for the business.
